Learning Management System

An LMS, or Learning Management System, is an online learning environment that allows a user to access learning materials from any location with an internet connection. T.A.S. Group can design and implement an LMS platform including organisation specific courses designed to either fit within an organisation's Management System, or as operate as a stand-alone solution.

T.A.S. Group LMS services will equip an organisation with an integrated education and training platform to manage:
its equipment	its processes & procedures	its regulatory requirement

LMS Features

Each course can be designed to fit a company's specific needs but are usually composed of at least 3 sections. Firstly, a presentation (the training material) that can be developed by the T.A.S. Group or can be adapted from an existing training course already running within the business. Secondly, an assessment or activity section, which can be set up to ensure a user has acquired a satisfactory level of understanding of the topic. Finally, a certification which can delivered once the user has acquired the pre-determined level of knowledge.

The content can be a collection of slides, video and audio files to enhance the user's experience.

T.A.S. Group LMS Services

T.A.S. Group will provide the initial set up and the maintenance of your LMS.

Set Up

- ☑ Full development of a training website including graphic design and layout
