

# T.A.S. Group

Total Assurance Solutions Group (T.A.S. Group), is an Australian based management consultancy that originated from Oil & Gas and Energy Resource Industries. We are focused on providing business and management system solutions for organisations, and helping businesses to reduce risk, manage their operations and ensure compliance.

The diverse background of our team means we are able to support all industries, whether construction, mining, manufacturing, technology or other sectors. We are focused on improving your businesses performance through our services and the use of technology to strengthen and enhance the systems at the core of your business.

## Management Services

T.A.S. Group can assist an organisation in identifying and clarifying its needs and developing and implementing size appropriate Business Management Systems (BMS) or Quality, Health, Safety & Environmental System (QHSEMS) to address any identified business risks or areas for improvement.

## Operational Assurance

T.A.S. Group offers many services centred around the delivery of efficient, reliable, safe operations, for your organisation and its stakeholders such as customers and suppliers.

## Contracting and Procurement

T.A.S. Group can assist you in developing strategies suited for your business needs and help you manage and strengthen supplier partnerships. We can also provide assistance in identifying weaknesses in current operations and aid in developing improvement plans for your contractors.

## Software Solutions

As part of our focus in providing management system solutions for our clients, T.A.S. Group utilises tools and software to aid in enhancing some of the processes involved in management systems. We also offer application development services related to T.A.S. Group core business.

## Learning Management System

An LMS, or Learning Management System, is an online learning environment that allows a user to access learning materials from any location with an internet connection. The T.A.S. Group LMS services uses the technical capacity of the LMS platform to develop a series of courses specifically designed and customised to either fit within an organisation's Management System, or as stand-alone solution.
